Composite Description: The Unigestion Defensive Eurozone Equities Composite was created by Unigestion on 13 December 2016 while The initial date of Composite performance began on 31 December 2016. The composite seeks to build up a portfolio offering the best possible ratio between the estimated risk and the expected return. The composite invests according to an active approach which involves identifying the portfolio with the optimum estimated risk in the euro area.

Benchmark: The benchmark is the MSCI Eurozone Net Return EUR, which is designed to measure the equity market performance of european countries. Benchmark returns are net of withholding taxes.

Fees: In April 2021, Unigestion adapted the GIPS net of fees calculations methodology, in order to provide our clients with a better representation of net returns. Prior to the change, we used the max fee methodology, while after the change we use the most representative fee (model fee). The change has been applied on all net returns (including the history).

Gross returns are presented gross of management fees, administrative fees but net of all trading costs and withholding taxes. Net returns are now calculated net of model fees and are derived by subtracting the most representative fee rate, which is 1.50% for time period 31/12/2016 through 31/12/2019, 1.05% for time periods 01/01/2020 through 31/12/2020, 1.15% for time periods 01/01/2021 through 31/12/2021 and 1.00% from 01/01/2022, in effect for the respective time period from the gross returns each month.
