ESG approach – Full Integration

Investments consider ESG/GHG exclusion from bottom up perspective and ESG/GHG tilt from top down, according to our 4 Pillar ESG integration approach. For more information please refer to our ESG policy (<https://www.unigestion.com/responsible-investment/policies-and-reporting/>).

SFDR classification: Article 8

The fund aims to fulfil SFDR Art. 8 requirements. Environmental and social characteristics are promoted in the fund. For more information please refer to Article 10 disclosures on our website (<https://www.unigestion.com/responsible-investment/policies-and-reporting/>).

INVESTMENT POLICY

The fund’s objective is to profit from opportunities offered by the European equity market. The portfolio is invested according to an active approach based on risk management, combining fundamental and quantitative analysis. The objective of the compartment is to outperform the index over the long term, with a lower level of volatility.

PERFORMANCE DISCLOSURE

\*Performance is expressed in EUR, net of fees. Past performance is not an indication of future performance. The sub-fund is actively managed and references MSCI Europe Index (the “Index”) for comparison purposes only. Risk statistics on a weekly basis.

## MARKET COMMENT (BASED ON THE SICAV REFERENCE CURRENCY)

European markets enjoyed a strong performance during February, rising 3.6% in Euro terms. The market was supported by a strong performance in Financials, with Banks in particular outperforming the wider index. By contrast, Information Technology was dragged lower by the broader malaise in the sector emanating from the US. Reflecting the growing geopolitical rift between Europe and the US, Defense names were very strong on the month. In this context, the fund increased by 3.01% in February, underperforming its benchmark by 62bp. The MSCI Europe TR Net increased 3.63%. The fund records a positive YTD performance of 8.41%, underperforming its benchmark by 253bp.

From an industry groups point of view, the selection effect explains the relative underperformance versus its benchmark, while the allocation was slightly favorable. The overexposure to Telecommunication (31bp) and underweight in Semiconductors (28bp) were particularly supportive, partially offset by a detrimental overweight in Commercial Services (-35bp). In terms of selection, the stock picking in Pharmaceuticals (-41bp) and Commercial Services (-34bp) was costly.

By country, the selection effect explains the relative underperformance, while the allocation was slightly advantageous. The stock picking in Spain (-70bp), Germany (-37bp) and the Netherlands (-36bp) generated the strongest relative losses. By contrast, the selection in Italy (30bp) was supportive. In terms of allocation, the overweight in Spain (44bp) added to the relative performance.

With a positive contribution of 26bp, not holding ASML in the portfolio, a Dutch company operating in the Semiconductors sector, was the top contributor to excess returns. Conversely, the overexposure to Wolters Kluwer, a Dutch corporation operating in the Commercial Services industry, was the largest detractor with -48bp.
