**Composite Description:** The Multi Asset Risk Targeted (Medium) Composite was created by Unigestion on 15 December 2014 while The initial date of Composite performance began on 31 December 2014. It consists of accounts which aim to deliver consistent smooth returns of cash + 5% gross of fees across all market conditions over a 3-year rolling period. It seeks to achieve this by capturing the upside during "bull" markets while protecting capital during market downturns.

**Benchmark:** Because the composite's strategy is absolute return and investments are permitted in all asset classes, no benchmark can reflect this strategy accurately.

**Fees:** In April 2021, Unigestion adapted the GIPS net of fees calculations methodology, in order to provide our clients with a better representation of net returns. Prior to the change, we used the max fee methodology, while after the change we use the most representative fee (model fee). The change has been applied on all net returns (including the history).

Gross returns are presented gross of management fees, administrative fees but net of all trading costs and withholding taxes. Net returns are now calculated net of model fees and are derived by subtracting the most representative fee rate, which is 1.20% for time period 31/12/2014 through 31/12/2019, 0.70% for time periods 01/01/2020 through 31/12/2020, 0.80% for time periods 01/01/2021 through 31/12/2021 and 0.65% from 01/01/2022, in effect for the respective time period from the gross returns each month.
